SUMMONS

THE STATE OF WISCONSIN

To each person named above as a defendant:

You are hereby notified that the plaintiff named above has filed a lawsuit or other legal action against you. The complaint, which is attached, states the nature and basis of the legal action.

Within forty-five (45) days of receiving this summons, you must respond with a written answer, as that term is used in Wis. Stat. ch. 802, to the complaint. The court may reject or disregard an answer that does not follow the requirements of the statutes. The answer must be sent

or delivered to the court at the Dane County Courthouse, 210 Martin Luther King Jr. Boulevard, Madison, WI 53703, and to Assistant Attorney General Cynthia R. Hirsch, plaintiff's attorney, whose address is Post Office Box 7857, Madison, Wisconsin 53707-7857. You may have an attorney help or represent you.

If you do not provide a proper answer within forty-five (45) days, the court may grant judgment against you for the award of money or other legal action requested in the complaint, and you may lose your right to object to anything that is or may be incorrect in the complaint. A judgment may be enforced as provided by law. A judgment awarding money may become a lien against any real estate you own now or in the future, and may also be enforced by garnishment or seizure of property.

Dated this 3 day of June, 2004.

Defendants.

COMPLAINT

The State of Wisconsin, by its counsel Attorney General Peggy A. Lautenschlager, complains of the defendants as follows:

INTRODUCTION

1. Each of the defendant pharmaceutical manufacturers has subverted the pharmaceutical reimbursement network in the United States, including Wisconsin, by publishing false and inflated wholesale prices for their drugs knowing that to do so would cause the State of

Wisconsin, its citizens, and Wisconsin organizations who pay the prescription drug costs of their members, to grossly overpay for these drugs. This complaint is brought to end this pernicious practice and to recover for the injured parties the damages they have incurred as a result of defendants' unlawful conduct.

PARTIES AND JURISDICTION

2. The State of Wisconsin brings this action on behalf of itself, its citizens, and Wisconsin organizations, (those which pay the prescription drug costs of their members, hereinafter "private payers") who have paid inflated prices for defendants' prescription drugs as a result of defendants' unlawful conduct set forth below.

3. The following defendants are all pharmaceutical companies who have indirectly sold drugs to Wisconsin, its citizens, and private payers at inflated prices by misrepresenting the wholesale prices of those drugs, as detailed below.

4. Defendant Abbott Laboratories ("Abbott") is an Illinois corporation with its principal place of business at 100 Abbott Park Road, Abbott Park, Illinois 60064-6400.

5. Defendant Amgen Inc. ("Amgen") is a Delaware corporation with its principal place of business at One Amgen Drive, Thousand Oaks, California 91320-1799.

6. Defendants AstraZeneca Pharmaceuticals, LP and AstraZeneca LP ("AstraZeneca") are Delaware corporations with their principal place of business at 1800 Concord Pike, Wilmington, Delaware 19850.

7. Defendant Aventis Pharmaceuticals, Inc. is a Delaware corporation with its principal place of business located at 300-400 Somerset Corporate Boulevard, Bridgewater, New Jersey 08807-2854. Aventis Behring, LLC is headquartered at 1020 1st Avenue, King of Prussia, Pennsylvania 19406-0901.

8. Defendant Baxter International, Inc. (“Baxter”) is a Delaware corporation with its principal place of business at One Baxter Parkway, Deerfield, Illinois 60015.

9. Defendant Bayer Corporation (“Bayer”) is an Indiana corporation with its principal place of business located at 100 Bayer Road, Pittsburgh, Pennsylvania 15205-9741.

10. Defendant Boehringer Ingelheim Corporation (“Boehringer”) is a Nevada corporation with its principal place of business located at 900 Ridgefield Road, Post Office Box 368, Ridgefield, Connecticut 06877-0368. Boehringer is the owner of Ben Venue Laboratories, which, in turn, is the parent of Bedford Laboratories.

11. Defendant Bristol-Myers Squibb Company (“Bristol-Myers”) is a Delaware corporation with its principal place of business located at 345 Park Avenue, New York, New York 10154-0037.

12. Defendant Dey, Inc. (“Dey”) is a Delaware corporation with its principal place of business at 2751 Napa Valley Corporate Drive, Napa, California 94558.

13. Defendant Fujisawa Healthcare, Inc. (“Fujisawa Healthcare”) is a Delaware corporation with its principal place of business located at Three Parkway North, Deerfield, Illinois, 60015-2548.

14. Defendant Gensia Sicor is a Delaware Corporation with its principal place of business at 19 Hughes, Irvine California 92618-1902.

15. Defendant GlaxoSmithKline, Inc. (“GlaxoSmithKline”) is a North Carolina corporation with its headquarters at Five Moore Drive, Post Office Box 13398, Research Triangle Park, North Carolina 27709.

16. Defendant Johnson & Johnson (“J&J”) is a New Jersey corporation with its principal place of business located at One Johnson & Johnson Plaza, New Brunswick,

New Jersey 08933. J&J is the owner of several pharmaceutical companies, at least three of which have also engaged in the practices described in this complaint, namely Centocor, Inc., Janssen Pharmaceutica Products L.P., and Ortho-Biotec.

17. Defendant Pfizer, Inc. ("Pfizer") is a Delaware corporation with its principal place of business at 235 East 42nd Street, New York, New York 10017. In April 2003 Pfizer acquired Pharmacia.

18. Defendant Pharmacia is a Delaware corporation with its principal place of business located at 100 Route 206 North, Peapack, New Jersey 07977. Pharmacia was created through the merger of Pharmacia and Upjohn, Inc., and Monsanto Company on March 31, 2000. Pharmacia was acquired by defendant Pfizer in 2003.

19. Defendant Schering-Plough Corporation ("Schering-Plough") is a New Jersey corporation with its principal place of business located at 2000 Galloping Hill Road, Kenilworth, New Jersey 07033-0530. Schering-Plough has engaged in the practices described in this complaint under its own name and through its wholly owned subsidiary, Warrick Pharmaceuticals Corporation.

20. Defendant TAP Pharmaceutical Products, Inc. ("TAP") is headquartered at Bannackburn Lake, Office Plaza, 2355 Waukegan Road, Deerfield, Illinois 60015. TAP is jointly owned by Abbott Laboratories and Takeda Chemical Industries, Ltd.

21. Defendant Watson Pharmaceuticals, Inc. ("Watson") is a Nevada corporation with its principal place of business at 311 Bonnie Circle, Corona, California 92880. Watson owns Schein Pharmaceuticals, Inc.

22. Jurisdiction and venue are proper in Dane County, Wisconsin in that all of the defendants do substantial amounts of business there.

DEFENDANTS' UNLAWFUL SCHEME

23. Each of the defendants and/or its subsidiaries identifies an Average Wholesale Price ("AWP") or a derivative thereof called the Wholesale Acquisition Cost ("WAC") for most, if not all, of the drugs it markets to the public. These prices are disseminated to the public by the defendants through publication in certain medical compendiums. Among the most prominent of these are Drug Topics Red Book, American Druggist First Databank Annual Directory of Pharmaceuticals, and Master Drug Database. These publications rely on the prices reported to them by the defendants. Federal and state agencies, as well as private payers, utilize these prices as a basis for their drug payments or reimbursements.

24. Knowing that the nation's drug reimbursement system was dependent upon their published wholesale prices, defendants, at least as early as 1992, embarked on an unlawful scheme to distort the system to their advantage. Defendants' scheme consisted (and consists) of three main parts. First, defendants systematically caused to be published arbitrary and inflated wholesale prices—AWPs and/or WACs—for their drugs. Second, defendants deeply discounted the published wholesale prices to some of their customers. And, third, defendants engaged in an elaborate and successful effort to keep the extent and nature of their discounts secret.

25. The purpose of this scheme is to market the spread between the true wholesale price of the drug and the false and inflated AWP and thereby increase the sales, profits and market shares of the defendants. Defendants believe that a false and inflated AWP encourages providers, including doctors and hospitals, to buy their products because by purchasing defendants' products, providers are enabled to use the inflated AWP to obtain reimbursement while actually purchasing defendants drugs at much lower prices. The higher the spread between the AWP and the real price the more profit a provider can make, and defendants often market

their products by pointing out (explicitly and implicitly) that their drug's spread is higher than a competing drug's.

26. One example of how defendants market this spread is Adriamycin, one of the drugs used in treating breast cancer. Defendant Pharmacia reported an AWP of \$241.36 for Adriamycin in April 2000 when it was actually selling the drug wholesale for as low as \$33.43, creating a "spread" of \$207.92. These spreads were then advertised to oncology providers in promotions which emphasized a wide margin of profit.

27. All of the defendants have fraudulently inflated the average wholesale prices of their drugs, and the drugs sold by their subsidiaries. One high-ranking industry executive has described it as the industry practice to do so. Indeed, defendant Dey brought a lawsuit against one publisher of a medical compendium who published the actual average wholesale price of Dey's drugs instead of the false average wholesale price sent to it by Dey. Dey's principal allegation in that lawsuit was that the publication of its actual prices for drugs was inconsistent with practice in the industry of accepting and publishing reported, inflated AWPs, and put it at a competitive disadvantage because it had no "spread" to advertise.

28. Attached as Appendix A is a list of drugs manufactured by the defendants and/or their subsidiaries that the U.S. Department of Justice, after an extensive investigation, found to have inflated AWPs. Indeed, the Department of Health and Human Services concluded the following with respect to all drugs utilized in the Medicare Program: "A general conclusion reached in reviewing GAO and OIG data is that there is a level of overstatement in the list AWP for *all* drugs" Payment Reform for Part B Drugs, 68 Fed. Reg. 50,430 (August 20, 2003) (emphasis added).

29. Moreover, the practice of inflating AWP's has generated substantial litigation around the country and led to complaints alleging that the wholesale prices of virtually all of defendants' drugs were inflated. For example, the attorney general of the State of Montana has filed a complaint listing more than 1500 drugs that he alleges to have false AWP's. See Appendix B attached hereto.

30. Examples of the defendants' practices of inflating AWP's are the following:

Manufacturer/Drug	2000 AWP	2000 Available Price	Spread	% Spread
Abbott/Amikacin Sulfate	\$1,212.44	\$150.00	\$1,062.44	708%
Baxter/ Dextrose	\$542.88	\$86.40	\$456.48	528%
Schering-Plough Corporation/ Albuterol Sulfate	\$72.60	\$21.92	\$50.68	231%

Appendix C contains examples of each of the defendants' practices of inflating their AWP's.

31. Finally, at least some of the defendants have engaged in a practice of inducing some of their providers to prescribe their drugs by giving away free samples knowing that the providers would seek reimbursement for the use of these free drugs, and by proffering fake educational grants, lavish trips and hidden discounts to such providers. Defendant TAP has already pled guilty to a federal criminal indictment for engaging in such conduct and Pfizer is currently the subject of a federal investigation for similar conduct in connection with the drug Neurontin.

32. As set forth below, defendants' scheme adversely impacts Wisconsin's Medicaid program, other state programs, *i.e.*, Senior Care, Medicare Part B participants, and Wisconsin private payers.

**THE ADVERSE EFFECT OF DEFENDANTS' SCHEME ON
WISCONSIN'S MEDICAID PROGRAM**

33. The State of Wisconsin's Medicaid program, as well as other state programs, *i.e.*, Senior Care, pays for medical benefits, including prescription drugs, for certain low income and disabled Wisconsin citizens. The Medicaid Program is a program jointly funded by the State of Wisconsin and the United States government and reimburses physicians and pharmacies for drugs and other healthcare services according to a predetermined reimbursement formula.

34. With some exceptions, reimbursement to pharmacies and physicians for drugs covered by the Wisconsin Medicaid Program is made at the AWP minus a percentage (currently 12 percent), plus other fees.

35. At all times, each defendant was aware of the reimbursement formula used in the Wisconsin Medicaid Program and the reliance of the Medicaid Program on the defendants' reported AWP.

36. By publishing false and inflated wholesale prices, and by keeping their true wholesale prices secret, defendants have knowingly enabled providers of drugs to Medicaid recipients to charge Wisconsin false and inflated prices for these drugs, and interfered with Wisconsin's ability to set reasonable reimbursement rates for these drugs.

37. As a consequence, Wisconsin's Medicaid program has paid more for prescription drugs than it would have paid if defendants had published their true wholesale prices.

**THE ADVERSE EFFECT OF DEFENDANTS' SCHEME ON
MEDICARE PART B RECIPIENTS**

38. Medicare Part B participants are adversely affected by defendants' scheme in that they pay a higher co-pay for their drugs than they would pay if defendants published their true wholesale prices.

39. Medicare is the federal insurance program that covers persons 65 and older and certain disabled persons. The Medicare program is administered by the Center for Medicare and Medicaid Services (“CMS”), which is under the authority of the Secretary of Health and Human Services. *See* 42 U.S.C. §§ 1395j-1395w.

40. Medicare generally does not cover the cost of prescription drugs that a Medicare beneficiary selfadministers. It does, however, cover some drugs, including ones that are administered by a doctor, and certain oral anti-cancer drugs. Approximately 450 drugs are covered by Medicare Part B. In excess of 700,000 Wisconsin residents are entitled to reimbursement under Medicare Part B for their medicines. In 2003, the estimated Medicare Part B co-payments in Wisconsin were in excess of 89 million dollars.

41. Through its Medicare Part B program, the federal government reimburses healthcare providers for up to 80 percent of the allowable cost of covered prescription drugs. The remaining 20 percent is paid as a co-payment by the Medicare Part B beneficiaries who receive the drugs, unless they are eligible for Medicaid. When the Medicare Part B beneficiary is eligible for Medicaid, the State of Wisconsin is responsible for the 20 percent co-pay. Some Medicare Part B beneficiaries who are not eligible for Medicaid purchase insurance to cover the 20 percent.

42. From 1992 to 1997, Medicare calculated reimbursement for Part B covered outpatient drugs on the basis of 100 percent of the published AWP. From 1998 to 2003, the Medicare Part B drug reimbursement rate for brand name drugs produced by a single manufacturer (referred to as single-source drugs) was 95 percent of the AWP. For drugs for which there are two or more competing brand name products (referred to as multisource drugs) or generic equivalents, the Medicare Part B drug reimbursement rate was 95 percent of the lower

of the median AWP of all generic forms of the drug or the lowest brand-name product AWP. Under the Medicare Prescription Drug Improvement and Modernization Act of 2003, certain drugs are reimbursed at 85 percent of the AWP as of January 1, 2004.

43. Because Medicare Part B participants must pay 20 percent of the allowable cost, which is based on the AWP, for their medications, and because defendants have published arbitrary and inflated AWPs for their drugs, Medicare Part B participants are paying substantially more for their co-pay—either directly or through higher insurance premiums defraying the cost of this co-pay—than they would pay if defendants published their true wholesale prices.

DEFENDANTS' SCHEME ALSO ADVERSELY AFFECTS ORGANIZATIONS PAYING FOR THEIR MEMBERS' PRESCRIPTION DRUGS

44. Private payers have been victimized by defendants' scheme in that they have entered into contracts with Pharmacy Benefit Managers ("PBMs"), organizations which they have retained to lower their drug costs, at drug reimbursement rates much higher than they would have had to pay if defendants had published their true wholesale prices.

45. Most private payers utilize, and are dependent on, outside companies called PBMs to handle the mechanics of their drug reimbursements including negotiating the price of drugs with drug manufacturers.

46. As the number of prescription drugs increased in the 1990s, the drug reimbursement process became increasingly complicated and prohibitively expensive. As a result, most organizations turned to PBMs to manage their drug reimbursements. PBMs had assembled vast quantities of information on the cost, availability, and comparability of many drugs. PBMs also asserted that they had the necessary bargaining power with defendants to negotiate lower drug costs. As a result, the principal private payers switched to PBMs, and PBMs became indispensable elements in the reimbursement programs of private payers.

47. The PBM industry rapidly consolidated so that by the late 1990s four PBMs, Express Scripts, Medco Health Solutions, Inc., Caremark RX and Advanced PCS (now owned by Caremark) were able to secure a huge portion of the reimbursement market (they now control 70% of the market consisting of in excess of 210 million people).

48. Despite soliciting business from private payers by asserting that their market power would enable them to obtain lower drug costs for their clients, the four major PBMs, and as well as many smaller ones, have, in fact, used their market power to obtain benefits solely for themselves. Defendants pay these PBMs huge fees and rebates, in part to secure placement of their drugs on the PBMs' formularies (the list of drugs available for purchase by the private payers' members), which increases the defendants' market shares and profits. Some of these fees and rebates are revealed publicly and passed on to the clients of the PBMs. But substantial rebates, and other economic inducements such as data access fees, research fees, education grants and promotional fees are kept secret from the private payer clients of PBMs, and the defendants so know. Indeed, the total of the fees and rebates paid to the four major PBMs by the defendants significantly exceeds the income PBMs receive from their clients, conflicting their relationship.

49. The inflated wholesale prices of the defendants are additional economic incentives to the PBMs to use defendants' drugs because high AWP's are a significant source of revenue for PBMs, and the defendants so know. For the reasons set forth below, PBMs are able to capture these revenues through their contracting arrangements with their private payer clients and pharmacies.

50. A person insured by a private payer purchases a prescription drug at a pharmacy and pays a co-pay. The remaining balance owed to the pharmacy is paid by the PBM that is

under contract with the private payer. The private payer then reimburses the PBM for the payment to the pharmacy. The PBM negotiates the price of a drug with both of its client, the private payer and the pharmacy that it reimburses. Because of their central placement in this process major PBMs, and other smaller ones as well, are able to, and do use defendants' inflated AWP, and the secrecy in which defendants cloak their true selling prices, to extract significant, undisclosed (to their clients) profits. They do this by negotiating with pharmacies to reimburse them at the AWP less a discount, for example, AWP less 15 percent. At the same time, the PBM negotiates with its private payer clients to reimburse the PBM at a higher price, for example, AWP less 10 percent. The PBM then keeps the 5 percent difference. The higher the AWP, the more this 5 percent spread is worth and the more money the PBMs are able to make under this arrangement. Additionally, for this same reason there is an incentive for PBMs to put drugs with the most inflated AWP on their formularies, further increasing the costs to private insurers.

51. The fact that PBMs can reap significant profits by utilizing defendants' false AWP enables and encourages PBMs to construct their private payer contracts around defendants' published wholesale prices, and defendants so know. The ability of PBMs to demand such contracts is enhanced by the secrecy in which the defendants cloak the true cost of their drugs. Encouraged and enabled by defendants' false wholesale prices, and the secrecy surrounding their true wholesale prices, PBMs have systematically entered into contracts with private payers, including those located in Wisconsin, which utilize defendants' inflated wholesale prices as a base point in connection with their fees, and defendants so know. But for defendants' conduct, private payers would have entered into reimbursement contracts based on the actual, lower prices of defendants' drugs. Thus, as a result of defendants' conduct, private

payers pay much more for drugs than they would if defendants published the true wholesale prices for their drugs.

HARM TO WISCONSIN, ITS CITIZENS, AND PRIVATE PAYERS

52. Defendants' unlawful activities have significantly impacted Wisconsin, its citizens, and private payers. Wisconsin has had to pay more for the drugs it purchases through its Medicaid program. Wisconsin Medicare Part B participants, who are primarily elderly and disabled citizens, have had to pay higher co-pays for their prescriptions than if defendants had truthfully reported the wholesale prices of their drugs. Private payers are also harmed by defendants' publication of false and inflated AWP's in that it has enabled and encouraged PBMs to enter into contracts with them based on these inflated prices causing them to pay far more for the drugs than if defendants accurately reported their wholesale prices.

COUNT I — Violation of Wis. Stat. § 100.18(1)

53. Plaintiff State of Wisconsin realleges and incorporates by reference all previous allegations.

54. Defendants' conduct described above violates Wis. Stat. § 100.18(1), which prohibits representations with the intent to sell, distribute, or increase the consumption of merchandise when the representation contains any assertion, representation, or statement of fact that is untrue, deceptive, or misleading.

55. Defendants' conduct constitutes a violation against the elderly and disabled pursuant to Wis. Stat. § 100.264(2) in that the defendants' conduct that violates Wis. Stat. § 100.18(1) was perpetrated against the elderly and/or disabled; and (a) each defendant should have known that its conduct was perpetrated against the elderly and/or disabled; (b) each defendant caused an elderly or disabled person to lose assets essential to the health or welfare of

those persons; or (c) the defendants' conduct caused economic loss that elderly or disabled persons are more likely to suffer due to age, poor health, impaired understanding, or restricted mobility.

56. Wisconsin, its citizens participating in the Medicare Part B program, and private payers have been harmed by defendants' deceptive conduct in falsely inflating their wholesale prices in that they have paid far more for the drugs manufactured by defendants than they would have paid had the defendants truthfully reported the average wholesale prices of their drugs.

WHEREFORE Plaintiff State of Wisconsin prays that the Court:

- A. Grant judgment for the plaintiff State of Wisconsin.
- B. Enjoin the defendants from continuing the unlawful practices described above.
- C. Grant plaintiff State of Wisconsin, its citizens, state programs, and private payers who have been harmed by defendants' practices, restitution to restore their pecuniary loss, pursuant to Wis. Stat. § 100.18(11)(d).
- D. Grant plaintiff its costs and attorney's fees.
- E. Impose forfeitures against the defendants as required by Wis. Stat. §§ 100.26(4) and 100.264(2), and the appropriate penalty assessments and costs as required by Wisconsin law.
- F. Grant such other and further relief as this Court deems just and equitable.

COUNT II — Violation of Wis. Stat. § 100.18(10)(b)

57. Plaintiff State of Wisconsin realleges and incorporates by reference all previous allegations.

58. Wisconsin Stat. § 100.18(10)(b) explicitly states that it is deceptive to represent the price of any merchandise as a manufacturer's or wholesaler's price, or a price equal thereto, unless the price is not more than the price that retailers regularly pay for the merchandise. Defendants' conduct in causing to have published wholesale prices that were and are significantly greater than the true average prices for drugs paid by pharmaceutical retailers (pharmacists and healthcare providers) was, and is, a deceptive act within the meaning of Wis. Stat. § 100.18(10).

59. Defendants' conduct constitutes a violation against the elderly and disabled pursuant to Wis. Stat. § 100.264(2) in that the defendants' conduct that violates Wis. Stat. § 100.18(1) was perpetrated against the elderly and/or disabled; and (a) each defendant should have known that its conduct was perpetrated against the elderly and/or disabled; (b) each defendant caused an elderly or disabled person to lose assets essential to the health or welfare of those persons; or (c) the defendants' conduct caused economic loss that elderly or disabled persons are more likely to suffer due to age, poor health, impaired understanding or restricted mobility.

60. Wisconsin, its citizens participating in the Medicare Part B program, and private payers have been harmed by defendants' deceptive conduct in falsely inflating their average wholesale prices in that they have paid far more for the drugs manufactured by defendants than they would have paid had the defendants truthfully reported the average wholesale prices of their drugs.

WHEREFORE plaintiff State of Wisconsin prays that the Court:

A. Grant judgment for the plaintiff State of Wisconsin.

- B. Enjoin the defendants from continuing the unlawful practices described above.
- C. Grant plaintiff State of Wisconsin, its citizens, and private payers who have been harmed by defendants' practices, restitution to restore their pecuniary losses, pursuant to Wis. Stat. § 100.18(11)(d).
- D. Grant plaintiff its costs and attorney's fees.
- E. Impose forfeitures against the defendants as required by Wis. Stat. §§ 100.26(4) and 100.264(2), and the appropriate penalty assessments and costs as required by Wisconsin law.
- F. Grant such other and further relief as this Court deems just and equitable.

COUNT III — Violation Of the Wisconsin Trust And Monopolies Act

61. Plaintiff State of Wisconsin realleges and incorporates by reference all previous allegations.

62. All of the defendants have discounted secretly from defendants' published prices with the intent and effect of injuring competition and creating artificially inflated markets and market prices for their products. Additionally, the defendants have paid PBMs secret discounts, rebates, and other economic benefits with the intent and effect of artificially inflating the private payer market for their products. As a result of this unlawful conduct, the market for the drugs manufactured by defendants has been artificially distorted, and the prices Wisconsin, its citizens, and private payers have paid for defendants' drugs increased beyond that which would have existed absent defendants' unlawful discounts and rebates.

63. Defendants have concealed the extent and nature of their unlawful activities as described above.

64. Defendants' conduct violates Wis. Stat. § 133.05, which prohibits the secret payment of rebates, refunds, commissions or unearned discounts.

65. Wisconsin, its citizens, and private payers have been damaged by defendants' conduct in that they have paid more for drugs than they would have paid if defendants had not engaged in the unlawful scheme described herein.

WHEREFORE plaintiff prays that the Court:

- A. Grant judgment for the plaintiff.
- B. Enjoin the defendants from continuing the unlawful practices described above.
- C. Impose forfeitures against the defendants as required by Wis. Stat. § 135.04(4), and the appropriate penalty assessments and costs as required by Wisconsin law.
- D. Grant Wisconsin and those injured by defendants' conduct threefold the damages suffered as a result of defendants' unlawful conduct.
- E. Grant plaintiff its costs and attorney's fees.
- F. Grant such other and further relief as the Court deems just.

**COUNT IV – VIOLATION OF WIS. STAT. § 49.49(4m)(a)(2)
MEDICAL ASSISTANCE FRAUD**

66. Plaintiff State of Wisconsin realleges and incorporates by reference all previous allegations.

67. Each of the defendants produces, markets, and sells pharmaceutical products for which the State of Wisconsin Medicaid Program makes a payment.

68. Each of the defendants knowingly made or caused to be made false statements or representations of material fact for use in the determination and calculation of payment by the Wisconsin Medicaid Program in violation of Wis. Stat. § 49.49(4m)(a)(2).

69. Each of the defendants use a variety of schemes, devices, agreements and false statements, and misrepresentations that had the effect of increasing the amount the Wisconsin Medicaid Program paid as part of the Medicaid Program.

WHEREFORE, the plaintiff respectfully requests:

- A. An amount reasonably necessary to remedy the harmful effect of the defendants' false and misleading publication and dissemination of their AWP.
- B. Forfeitures in the amount of not less than \$100 and not more than \$15,000 for each AWP reported by each defendant for the last ten years.
- C. The reasonable and necessary costs of investigation and prosecution of this case, including actual attorney's fees.

COUNT V — Unjust Enrichment

70. Plaintiff State of Wisconsin realleges and incorporates by reference all previous allegations.

71. As a result of defendants' misleading pricing information, Wisconsin, its Medicare Part B participants, and private payers purchased drugs at prices greater than they would have had defendants not engaged in unlawful conduct.

72. Each defendant knew that Wisconsin, its Medicare Part B participants, and private payers were being overcharged by pharmacy providers and physicians as a direct result of defendants' misleading pricing information.

73. As a result of defendants' unlawful conduct, defendants obtained increased sales, market share and profits at the expense of Wisconsin, its citizens, and private payers.

74. Each defendant knew that it was not entitled to the profits it realized from the increased sales, and market share that resulted from the excessive payments made by Wisconsin, its citizens, and private payers.

WHEREFORE plaintiff prays that this Court:

- A. Grant judgment for plaintiff.
- B. Enjoin the defendants from continuing the unlawful practices described above.
- C. Require the defendants to disgorge all profits they realized as a result of their unlawful conduct.
- D. Grant plaintiff its costs and attorney's fees.
- E. Grant such other and further relief as the Court deems just.

PLAINTIFF DEMANDS TRIAL BY JURY OF 12.

Human Services (DHHS)
HEALTH CARE FINANCING
ADMINISTRATION (HCFA)

Transmittal AB-00-86

Date: SEPTEMBER 8, 2000

CHANGE REQUEST 1232

SUBJECT: An Additional Source of Average Wholesale Price Data in Pricing Drugs and Biologicals Covered by the Medicare Program

The purpose of this Program Memorandum (PM) is to provide you with an alternative source of average wholesale price data (attached) for some drugs and biologicals covered by the Medicare program. The first attachment includes data for 32 drugs that you are to consider in determining the Medicare payment allowances for your January 2001 quarterly update. The second attachment includes data for 14 oncology drugs and 3 clotting factors that are not to be implemented in that same quarterly update.

The payment allowance for drugs and biologicals covered by the Medicare program is described in PM AB-99-63. That PM states that drugs and biologicals not paid on a cost or prospective payment basis are paid based on the lower of the billed charge or 95 percent of the average wholesale price reflected in sources such as the Red Book, Blue Book, or Medispan. Examples of drugs that are paid on this basis are drugs furnished incident to a physician's service, drugs furnished by pharmacies under the durable medical equipment benefit, covered oral anti-cancer drugs, and drugs furnished by independent dialysis facilities that are not included in the end stage renal disease composite rate payment. While the Blue Book is no longer available, another publication, Price Alert, is available. Also, there are electronic versions of the same data.

The data in the attachments have come from the United States Department of Justice (DOJ) and the National Association of Medicaid Fraud Control Units (NAMFCU). They are an alternative source of average wholesale price data for certain drugs, which has recently become available to HCFA. These data have been compiled for about 400 national drug codes (NDC) representing about 50 different chemical compounds. These data are from wholesalers' catalogs that list the prices at which the wholesaler sells the respective products. The DOJ has indicated that these are more accurate wholesale prices for these drugs.

Furthermore, the DOJ has indicated that because purchasers often receive further discounts below the advertised wholesale catalog price, either from a wholesaler or from the drug manufacturer directly, actual acquisition costs may be lower. The DOJ indicates that some physicians and suppliers obtain drugs at prices lower than the wholesale catalog prices through Group Purchasing Organizations (GPO). For example, the DOJ data from wholesale catalogs indicates an average wholesale price of \$22 for one albuterol sulfate NDC which is substantially less than the \$73 average wholesale price in the Redbook and compares to \$15 from a GPO. These data are generally consistent with findings from OIG reports.

There has been correspondence with some members of congress on this subject. Under separate cover, we will send you a letter from the Administrator to Members of Congress, which places in context the issue of pricing drugs covered under the existing Medicare drug benefit and this new source.

DOJ and NAMFCU have provided these data to First Data Bank, a company that compiles average wholesale prices for most State Medicaid programs. On May 1, 2000, First Data Bank provided these new average wholesale prices to State Medicaid programs. Some States have already implemented these new average wholesale prices while others have not.

HCFA-Pub. 60AB

APPENDIX A

You are to consider these alternative wholesale prices as another source in determining your January, 2001 quarterly update for the 32 drugs (Attachment 1), as per PM AB-99-63. These drugs account for 75 percent of Medicare spending and 70 percent of savings (based on DOJ data) for the drugs on the complete DOJ list. However, we have some concern about access to care related to the DOJ's wholesale prices for 14 chemotherapy drugs and 3 clotting factors (Attachment 2), due to other Medicare payment policies associated with the provision of these drugs for the treatment of cancer and hemophilia. Therefore, you are not to consider at this time using the DOJ data for these drugs (Attachment 2) to establish your Medicare allowances while we further review these concerns and develop alternative policies. For the drugs shown in Attachment 2, use your usual source of average wholesale prices in your next quarterly update.

The data in these attachments may not represent all of the NDCs for a drug or biological in applying the pricing rules described in PM AB-99-63; if you decide to use these data, then you must use solely these data as the source of average wholesale prices in establishing your Medicare payment allowances for the drugs in Attachment 1.

You are to report by October 15, 2000, your usual source as well as the source you intend to use for the January 2001 updates. Also, you are to provide a list of what the updates would be for the source(s) you identify as usual and for January 2001 updates, and the percentage difference, if any, for all the drugs listed in Attachment 1 and 2 (source for drugs in Attachment 2 can not be DOJ data). You are to submit these reports electronically to a special mailbox being established for this purpose. The e-mail address for this mailbox is **DOJAWP@hcfa.gov**.

For the drugs in Attachment 1, we may provide additional guidance by the end of October, which could affect your January 2001 updates. We will provide guidance in subsequent correspondence that concerns your future drug updates, and on Medicare allowances for the drugs listed in Attachment 2 as any necessary adjustments to other payments related to the provision of these drugs are being carried out. We will also convey how we plan to adjust Medicare allowances under the outpatient prospective system for drugs that are both subject to the AWP rules and paid on a passthrough basis.

The enclosed data show a price for each NDC that is an average of the wholesale prices in the catalogs of the various wholesale companies that are also shown. The DOJ indicates that these wholesalers have toll-free numbers (included in Attachment 1) and the capacity to supply drugs via overnight delivery to any place in the country. If you decide to use these data and if a physician or supplier indicates that they cannot obtain one of these products for the average wholesale price in this new source, you may explain to the physician or supplier that one or more of the wholesale companies in the attachment have indicated to the DOJ that they supply these drugs at or below these prices. You may give the physician or supplier the name and toll-free number of the wholesaler(s). You may also give the name and telephone number of the manufacturer of the drug (available in the Red Book) as DOJ has indicated that manufacturers often supply the drugs directly. Some of the manufacturers also have web pages on the Internet. Physicians or suppliers who are members of a GPO might also obtain these drugs through that organization at or below these average wholesale prices. However, you should not imply in any way that the physician or supplier is required to change their procedure for obtaining drugs. Further, you should indicate that you are not advocating the use of these sources and do not assume any liability for the choice of source by the physician or supplier.

Sections 1842(o) and 1833(a)(1)(S) of the Social Security Act (the Act) require the Medicare program to set payment allowances for drugs and biologicals at the lower of the actual amount billed or 95 percent of the average wholesale price. The attached data represent another source of average wholesale prices for the products on the attached list. Therefore, use of this new source of average wholesale prices in Attachment 1 is not an inherent reasonableness adjustment under paragraphs (8) and (9) of section 1842(b) of the Act.

The procedure for processing intermediary claims has not changed. As described in PM AB-97-25, all carriers will continue to furnish free of charge their drug payment allowance updates for all drugs and biologicals directly to the fiscal intermediaries in their jurisdiction. Carriers should contact the fiscal intermediaries to determine the preferred method of transmission. Carriers are to send this information to all fiscal intermediaries with whom they routinely deal. To further clarify, fiscal intermediaries must use each carrier's drug payment allowances for claims submitted under that carrier's jurisdiction.

Attachments (3)

The effective date for this (PM) is September 8, 2000.

The implementation date for this PM is September 8, 2000.

These instructions should be implemented within your current operating budget.

This PM may be discarded September 1, 2001.

If you have any questions contact Robert Niemann at 410-786-4531.

Attachment 1 – If you decide to use these data, use solely these data to update the HCPCS billing codes that correspond to the drugs on this list.
